

benchmark

a Coravin Vinitas™ Service Point - for the creation of single-serve wines

delivering fractionalisation of wines into 100ml bottles to support your ideas for sales, sampling, and marketing

the system

The system requires the use of a 100% recyclable Coravin Vinitas™ bottle.

During filling a special membrane in the cap is pierced, air evacuated, and your wine transferred under inert gas.

“Clone”, or fractionalise a 750ml bottle into 7 x 100ml units.

inclusions

Our boxing suggestions have space for inclusion of your promotional information when required. **(prospect, personalised letter, wine explanation, tasting notes, price list, tasting notes, order form...)**

opportunities

Dry goods (stickers, labels, boxes) can be sourced from your existing suppliers or from our packaging partner.

We have a range of generic packaging which may be customised for a bespoke offering and allow costs to be optimised.

- boxes for 1, 3, or 6 bottles for presentation or economic shipping.

our services

Our **service rates** are tailor made for each and every project, covering what you need and not more;

- fractionalisation
- labelling
- inclusion of your promotional materials
- carton packing
- onward shipping

“**...solutions as individual as your wines**”
